

European Train Names: a Historic Outline*

Christian Weyers

DOI: 10.2436/15.8040.01.201

Abstract

This paper gives a first overview of the onomastic category of train names, searches to classify the corpus and reviews different stages of their productivity. Apart from geographical names (toponyms, choronyms, compass directions) generally indicating points of origin and destination of the trains in question, a considerable number of personal names have entered this category, of classical literary authors, musicians and scientists, but also of many fictional or non-fictional characters taken from literature or legendary traditions. In some cases also certain symbolic attributes of these persons and finally even heraldic figures have given their names to trains.

In terms of their functionality, train names originally were an indicator of exclusiveness and high grade of travel quality, but they developed gradually, as they dispersed over the European continent, into a rather unspecific, generalized appellation, also for regional and local trains. After two periods of prosperity after 1950, the privatisation of railway companies starting in the 1990s had again a very positive effect on the category, as the number of named trains initially reached a new record in this decade.

The first train names appeared in England in the 1860s in addition to names for steam locomotives, and on two different levels. The *Special Scotch Express* between London King's Cross and Edinburgh (inaugurated in 1862) was called by the public *The Flying Scotsman* from the 1870s, but it succeeded as the official name not before 1924. Also the names of the German diesel trainsets *Der Fliegende Hamburger* and *Der Fliegende Kölner* were colloquial name creations, as were the *Train Bleu* and the *Settebello* operated from 1922 and 1953 but officially named in 1947 and 1958, respectively.

An important step in the development of train names was the foundation of the *Compagnie Internationale des Wagon-Lits (CIWL)*. The trains which the Company operated as from the 1880s circulated over considerably long distances and were all assembled with high-class Pullman or similar cars. They all bore individual names without exception. Nevertheless the creativity of their inventors was rather limited; along with the *Orient ~*, *Nord ~* and *Sud Express* only one formula was used: *Calais-Nice-Rome-Express* (1883), *Paris-Karlsbad-Express* (1901) and so forth, combining the names of the corresponding places of origin and destination. This pattern was still in use after 1945, but referred now for the most part to trains composed of regular passenger cars and was thus no longer part of a luxury concept. It has been fading away only gradually: a certain number were still running at least in the early 1980s, but at present just one single example, the *Berlin-Warszawa-Express*, has survived in Central Europe or rather was reintroduced in 2002.

Another important area of the Company's activities were the so-called "Trains Transatlantiques" or boat trains, a shuttle service to the big passenger liners moored at Cherbourg, Genoa, Le Havre, etc. Some of these trains had rather pretentious names as, for instance, *Transatlantique Express* and even *New York Express*, although the first ended at Le Havre and the second at Cherbourg (cf. BEHREND 1962: 198). The *Marseille-Bombay-Express* which ran from Calais to Marseille connected the P&O (Peninsular & Oriental Co.) steamers to

* This article is accompanied by a complete list of European train names of a selected period, based on the 1978/1979 winter timetables or the closest preceding or following schedules available.

Egypt and India; the *Egypt Express* (1906), one of the various shuttle trains operated for the *Norddeutscher Lloyd*, offered a similar feeder service to Naples.

In all train names of this first generation, only the English term *Express* was commonly used as a generic and the typical Germanic sequence of components was universal almost from the beginning. In French, Italian and Spanish, contrary to ordinary syntactic practice, the words *Express* and *Expreso* appear regularly behind the specific. The (Train) *Express d'Orient* became the *Orient Express* as early as 1891.

Ironically both characteristics were introduced by a mainly French-speaking company and have been maintained by France and francophone Switzerland, whereas on the other side of the English Channel names with *Express* were never as popular and eventually abandoned. Furthermore, this practice was contrary to the general use of French as a vehicular language of the European railway services which rendered, for instance, the name of the Greek capital into *Athènes* (cf. WEYERS 2003: 284). Only Poland and former Czechoslovakia avoided the English term. In Germany and Switzerland it has eventually been omitted only in certain cases, as in *Rheingold-Express* (formerly *Rheinpfeil*), which became *Rheingold* in 1954 (for the complete history of this train see ERNST 1988).

There are several types of name composition:

1. A combination of the names of the termini: *Beograd-Basel-Express*, *București-Wien-Express*, *Hoek-Warszawa-Express* etc. As a variant only one terminal is mentioned: *Sevilla-Expreso*, *Istanbul-~*, *København-~*, *Leningrad-Express*, etc.
2. Names of the connected countries, states or regions, including historical names, have been combined with each other (*Italien-Holland-Express*, *Holland-Skandinavien-Express*), one of which can be a place name instead (*Paris-Côte Vermeille*) or a name of a coastal region of important tourism, especially situated on the Mediterranean: *Schweiz-Adria-Express*, *Flandres-Riviera*. In a subgroup only one choronym appears. From December 1955 the *Balkan-~*, *Dalmatia-/Dalmacija-~*, *Hellas-~*, *Hispania-~*, *Italia-~* and *Jugoslavia-/Jugoslavija-Express* carried the so-called “Gastarbeiter” to Central Europe and back to their home countries. The railway lines to Southern Europe were also the infrastructure of the incipient mass tourism to the Mediterranean. So some of the names of this group reflected attractive regions of the Alps: *Kärnten-~*, *Schweiz-~*, *Steiermark-Express*, *Ticino*, *Tirol-~*, *Vorarlberg-Express*, *Wörthersee (-Express)*, etc.
3. Apart from these trains especially dedicated to workers and tourists, the 1960s and 1970s were characterized by an increasing use of choronyms with regional references, usually applied to relations between the metropolis and the region or district referred to: *Aquitaine* (Paris–Bordeaux), *Bucovina* (Bucharest–Vatra Dornei), *Carinthia* (Wien–Klagenfurt), *Extremadura Expreso* (Madrid–Badajoz), *Maramureș* (Bucharest–Satu Mare), *Moldova* (Bucharest–Iași), *Słęza* (Warsaw–Wrocław) etc. But also international trains with a considerably long route belong to this group: *Tracia/Trakia* (Varna/Sofia–Prague–Leipzig), *Lombardie-Express* (Venice–Milan–Paris).
4. Hydronyms are also an important name source. Railway lines often follow big rivers (in some cases, e.g. on the Middle Rhine, on both banks) and have to cross them, sometimes passing a state border at the same time: *Danubius-Express* (İstanbul/Moscow–Sofia–Bucharest); *Rhein-Express* (Hook of Holland–Innsbruck), *Rhein-Main*, *Tissa/Tisza-Express* (Moscow–Budapest), *Transdanubium* (Burgas/Varna–Prague). Rivers can finally also be chosen as representatives of big cities (*Rhône-Isar*, Lyons–Geneva–Munich). As to the adjacent waters of the European continent, *Adria-Express*, *Atlántico Expreso*, *Baltyk*, *Marea Neagră*, *Nordsee-~* and *Ostsee-Express* are not missing; the latter crossed the Baltic Sea from Warnemünde to Gedser on a train ferry.
5. The greatest challenge for railway constructors were mountains, which had to be overcome by masterpieces of steep sections, tunnels, bridges, viaducts, etc. So train

names including oronyms not only indicate the passage of a certain mountainous region during the route (which often also means one or several state border passages), but also seem to honour the enormous endeavour, sometimes accompanied by a certain number of lost lives, during the construction of the mountain tracks: *Alpen-~*, *Carpați-Express/Karpaty*, *Dolomiten-~*, *Tauern-Express* and others correspond to international, *Bieszczady*, *Schwarzwald-Express*, etc. to national relations. A subgroup gathers names of certain massifs (*Dachstein*, *Karwendel*, *Silvretta*) or of single summits or capes (*Le Mont Cenis*, *Großglockner*, *Loreley*, *Peloritano*). Some of these names refer exclusively to the mountain pass crossed by the train (*Arlberg-~*, *Bernina-~*, *Brenner-~*, *Gotthard-~*, *Simplon-~*, *Simplon-Orient-Express*, *Puerto de Castilla Expreso*) or to narrow passages between mountains or hills (*Porta Westfalica*). In many of them the oronyms stand for a greater region of destination (*Beskidy*, *Göcsej-~*, *Somogy-Expresssz*, *Sudety*, *Tatry*; *Pyrénées-Express*, *Karkonosce*, etc.).

6. Ethnic names or ethnonyms are used, and often – in France and England regularly – accompanied by the definite article. The use of the article bestows some kind of a personal character on the train, especially when added by an adjective or a nominal complement (as was typical in the case of *British Rail*) and calls to mind appellations of military vessels, e.g. of the French navy.
7. With reference to cities there are *The Aberdonian*, *The Leeds Executive*, *The Manchester Pullman*; *Le Lyonnais*, *Le Nantais*, *Le Phocéen* (Paris–Marseille); *Berlinaren*; *Krakus*, *Opolanin*; *Hradišťan*, *Kosičan*, *Nitran*, *Ostravan* ‘from or to Berlin, Cracow, Opole, Uherské Hradiště, Kosiče, Ostrava’, etc.

As to the reference to regions, provinces, etc. there are *The Night Scotsman*, *The Royal Highlander*, *The Royal Scot*; French *Le Cévenol* (Clermont-Ferrand–Marseille, Paris–Marseille), *Le Limousin* (Limoges–Paris, Brive–Paris), *L’Occitan* (Paris–Toulouse) and Czech and Polish *Kaszub*, *Kujawiak*, *Moravan*, *Pomorzanin*, *Wielkopolanin*. In German-speaking countries this type is relatively rare (*Der Oststeirer*).

8. Although the names *Nord ~* and *Sud Express* sound rather unspectacular, they reflect the great dream of GEORGES NAGELMACKERS, the founder of the International Sleeping-Car Company. The Paris–Lisbon train was inaugurated in 1887, the connection Oostende/Paris–St. Petersburg/Riga followed in 1896. After several interruptions the connection to the Soviet Union had to be finally given up in 1939, so after the War the *Nord-Express* connected Paris with Copenhagen, Stockholm and Oslo. The *Ost-West-Express* Moscow–Paris (which retained the name on the way back) and finally the Czech *Západní expres* completed the system, particularly when this train from Prague to Frankfurt-on-the-Main received a through coach to Paris.

Compass directions are closely related to anonyms and astronyms which may include planets and cosmic phenomena: *Cygnus* (Milan–Ventimiglia), *L’Étoile du Nord* (initially Paris–Amsterdam/Den Haag), *Komet* and its recent counterpart *Meteor* (the last three recall names which had been used for British locomotives in the early 19th century, cf. COATES 2009: 214, 217–218, 221, 223). More recently names of this kind have been taken categorically for sleeper trains: *Cassiopeia*, *Pegasus*, *Orion*, *Pluto*, *Pollux*, *Saturn*, *Venus*, *Vega*.

The direction of the *Mistral*, a rough, dry wind from the north or northwest, accelerated by some jet effect caused by the narrow mountain passages (< *maestral* < Old Provençal *maistral*), has been more or less followed by the homonymous *Rapide* and later *TEE* from Paris to Marseille and – from 1952 – further to Nice. It is a current meteorological phenomenon in Mediterranean countries and thus of general importance as well in the Adriatic, where another *Maestral* related Budapest, Zagreb and Split. Train names formed with *-blitz* (*Rheinblitz*) and *-pfeil* could also be added to this group. They

allude to a higher speed which sometimes really was the case, as the *Rheinpfeil*, for instance, was in fact listed –e.g. in the late 1970s– as the fastest train service of Western Germany. The *Dompfeil* originally started and ended at Cologne, the *Nordpfeil/Nordpilen* went from Hamburg (and later also from Hanover and Göttingen) to Frederikshavn; another *Nordpilen* from Stockholm and Sundswall to Kiruna and Luleå. The *Slovenská Strela* ran from Prague to Bratislava; the *Flèche d'Or/Golden Arrow* (1926–1972) from Paris to Boulogne or Calais and from Dover to London, and the *Flèche d'Argent/Silver Dart* carried passengers from the Gare du Nord right to the airfield of Le Touquet Airport only a few metres from the aeroplane headed for London Gatwick, Southampton and Southend.

In the last two examples adjectives of colour have been used. In Europe this tradition began with the famous *Train Bleu*, first (from 1922) a colloquial name for the *Calais-Méditerranée Express* and then the official appellation (from 1947) with reference to the official colour of the CIWL and to its blue and golden luxury cars (cf. BEHREND 1962: 24, 100; MÜHL/KLEIN 1998: 40). The name subsisted until 2007 and it may have inspired other *Blue Trains* all over the world, for instance between Cape Town and Pretoria (1923, since 1946 under this name), the *İzmir Mavi Tren* between İstanbul and İzmir, the *İç Anadolu Mavi Treni* between Istanbul and Adana or the *Treno Azzuro* between Milan and Naples. It is a remarkable fact that the colour adjective “blue” was almost the only one used: *Синият Дунав* (‘blue Danube’), *Blękitna Fala* (‘blue wave’), *Camino Azul*, *Blauer Enzian*, *L’Oiseau Bleu*, *La Palombe Bleue/La Paloma Azul*.

Common to almost all the examples mentioned above is the fact that they were monolingual. Although commonly discussed at the European Timetable Conferences, certain international trains were often named by one specific railway company because it was their main operator. This situation became more noted after the introduction of the *TEE* in 1957. The trains composed of *SNCF* cars had almost exclusively French names, those run by the *Ferrovie dello Stato* were generally Italian. The language question occasionally arose with regard to the mixed French-Belgian (*SNCF-SNCB/NMBS*) compositions to Brussels and Amsterdam. So during the Timetable Conference of 1973 the suggestion *Manneken* was rejected by the *SNCF* (whereas the name of the painter *Memling* was approved; cf. MERTENS 1987: 234). Choosing Latin as a lingua franca seemed to avoid all these problems. After having been used sporadically by the *DB* in the 1950s (*Helvetia, Italicus*), Latin as a name constituent became more frequent in the 1960s, sometimes replacing odd German appellations which had been too long, but it seems to have been particularly popular in the Eastern European States: *Bohemia, Hungaria, Pannnonia, Polonia(-Express), Saxonia, Silesia, Slovakia, Tracia* etc. Metropolises were reached by the *Berolina, Cracovia, Lutétia, Mediolanum, Varsovia* and *Vindobona*. Although not all of them were strictly “Latin”, most of the names of the international trains through Eastern Europe – although absolutely unspecific in significance – were readily accessible by the languages of the participating companies (*Amicus, Favorit, Meridian, Metropol, Neptun, Progress*), a practice that revealed considerable difference between the Eastern and Western German naming systems. Latin is, of course, also to be found among the Italian and Spanish names, but here it is rather a medium of self-identification (*Mare Nostrum*) and even coincides with modern Romance in certain forms.

9. Very popular became the selection of famous buildings or other objects as landmarks or representatives of a certain city or region. These might be castles or similar constructions usually erected above the modern city (*Akropolis, Hohensalzburg, Parthénon, Wawel*), gates or monuments located inside (*Colosseum, Roland, Puerta del Sol, Torre del Oro*) which are considered suitable for identification (although the *Parthénon* did not reach the Greek capital directly as did the *Akropolis*, but ended at the ferry port of Brindisi).

Stanislas (Paris–Strasbourg) stands for the Place Stanislas at Nancy; *Le Capitole du matin* and *~ du soir* (Paris–Toulouse) recalls the Town Hall of Toulouse, named after the chapter of city counsellors (*consouls* > *capitouls*) instituted in 1190 by ALPHONSE JOURDAIN.

10. On still another level of abstraction personal names and generics have also been transferred. There may be again (at least used to be at the moment of naming) a certain parallelism between the train route and the curriculum vitae of the person selected: *Heinrich der Löwe* (Brunswik–Cologne–Munich), *Faidherbe* (Paris–Lille–Tourcoing), *Jules Verne* (Paris–Nantes); in other cases the personal name is a selective cultural symbol of the whole country: *Francisco de Goya* (Madrid–Paris), *Rembrandt* (Munich/Basel–Amsterdam), *Tiziano* (Milan–Amsterdam/Hamburg) or at least of the regions connected: *Joan Miró* (Barcelona–Paris), *Pau Casals* (Barcelona–Zürich), *Pío Baroja* (Gijón–Barcelona), *Rosalía de Castro* (A Coruña/Vigo–Barcelona), *Salvador Dalí* (Barcelona–Milan). It may also stand for important buildings, sculptures etc. located in the corresponding city or cities, cf. *Fischer von Erlach* (Graz–Vienna), etc.

The *Puškin* (Beograd–Budapest/Moskau) is a reminder of ALEKSANDR SERGEJEVITSCH PUŠKIN who had visited the lyceum at Zarskoje Selo (1918 Detskoje Selo, 1937 Puškin). The year of the second renaming of the town for the centennial of the writer's death was also the year the first Russian train connection from here to Petersburg was opened. In the 1970s also personalities of more recent political and military history appeared in such a function, as well as of the Middle Ages (*Barbarossa*, Stuttgart–Sestri Levante) or of antiquity (*Dioklecijan*, Belgrade–Šibenik/Split), *Decebal* (Bucharest–Arad); and finally also legendary and mythological characters. Whereas *Gambrinus* denoted a train between the “beer capitals” Munich, Dortmund and Hamburg and *Romulus* and *Remus* both start and end in Rome, certain figures of Greek and Roman mythology (*Bacchus*, *Hermes*, *Ερμης Express*; *Merkur*, *Neptun* – the last two also planet names, see above) seem geographically to be unspecific. So are many personal generics that came up with the creation of the German “Intercity A” system in 1971 (*Diplomat*, *Kommodore*, *Konsul*, *Präsident*, *Prinzipal*, *Senator*). The significance of some heraldic figures, as, for instance, *Sachsenross* (cf. WEYERS 2007), may also originally have been closely related to the route of the train, but later lost this relationship again.

11. Besides architecture works there are also pieces of literature or music as a source of train names. *L'Étoile du Nord* mentioned above was also an opéra comique in three acts by GIACOMO MEYERBEER (JACOB LIEBMANN BEER). As to the *Oiseau Bleu* (1927 Paris–Antwerp, 1947 Paris–Brussels, reintroduced in 1957 as a TEE), allusions are possible either to the fairy tale of the COMTESSE D'AULNOY (MARIE CATHERINE LE JUMEL DE BARNEVILLE) as well as to the theatre play by MAURICE MAETERLINCK and the homonymous opera by ALBERT WOLFF, first performed in 1919, all of which originated in the northern part of France or Belgium. *De Blauwe Vogel* is also the name of a renowned travel agency of Flanders. Among operas the *Parsifal*, also a name creation for a TEE (later *Rapide*, IC and EC train) between Paris and Dortmund (1960 Paris–Hamburg, 1979 Paris–Cologne) recalled a particular example of French-German literary exchange. Based on the romance *Perceval li Gallois* (1190) by CHRÉTIEN DE TROYES, the plot of the Arthurian legend became the nucleus of the *Parzival* by WOLFRAM VON ESCHENBACH, written in the first decade of the 13th century, which in turn was the inspiration for RICHARD WAGNER'S opera. This might still be considered insufficient for the use of this name for a train, if there were not the phonetic allusion to the place-name *Paris* which conveys a peculiar ambiguity. This allusion traces back to the erroneous etymology given by JOSEPH VON GÖRRES (1813: VI) that made WAGNER decide to use an *s* instead of a *z* in the title of his opera.

Conclusion

Names for passenger trains developed on the European continent, whereas in the British Isles where they originally appeared their importance never reached a comparable grade. A traditional pattern, one or two geographical names combined with the word *Express*, a characteristic feature of the connections operated by the *Compagnie Internationale des Wagon-Lits* (CIWL), was superseded, from the 1920s onwards, by an increasing number of new name classes ranging from names of specific or regional reference along the train line, persons and cultural masterpieces related to it, to rather unspecific generics of persons, birds, flowers, constellations and planets. Their original function as an indicator of exclusiveness and premium quality travel was still perceivable in the *TEE* concept – after its withdrawal some renowned names were preserved for ordinary trains – but could not be maintained with the increasing categories of two-class trains subsequently introduced for a wider public. The label of individuality that most of them still received developed gradually into an insignificant tag. As a result of the absorption of many formerly nameless trains into such a global naming system, a variety of approximately 300 old and new entries could be observed in the early 1990s on the German net. Certain names which had been in use from the 1950s to the 1970s reappeared again, but were now mostly assigned to a different train route. However, this last prosperity was followed immediately by an ultimate decline. So the climax of significance train names had between 1950 and 1970 has never been reached again.

European Long-distance Trains with Names

Data are based on the 1978/1979 winter timetables or the closest preceding or following schedules available (S=Summer, W=Winter). If not specified, the name and the regular route of the train refer to both journeys, the numbers of the return trains appearing below. Designations four groups of trains (e.g., *Alpes 2000*, *Donau-City*, *France-Alp Express*, *Métrolor*) are not included in this list. Relevant transit and junction stations without regular stops appear in parentheses. Scheduled operational restrictions are to be found in the last column.

Appendix 2: Officially abbreviated termini, junction stations and interchange tracks

Hbf = Hauptbahnhof

Abzweigstelle [München] Landsberger Straße	Málaga-Principal
Alicante-Término/Alicante-Terminal/Alacant-Terminal	Malmö centralstation
Avesta centrum	Messina Centrale
Amsterdam Centraal (Station)	Messina Marittima
Antwerpen Centraal (Station)	Milano Centrale
Barcelona-Paseo de Gracia/Barcelona-Passeig de Gràcia	Milano-Lambrate
Barcelona-Término/Barcelona-Terme	Moskva Passažirskaja Kievskaja/Москва-Пассажи́рская-Киевская/Kievskij Vokzal/Киевский вокзал
Bari Centrale	Murcia del Carmen
Basel Badischer Bahnhof	Napoli Centrale
Basel Schweizer Bundesbahnhof	Norrköpings centralstation
Benevento Centrale	Nyborg Færgehavn
Berlin Ostbahnhof	Nyköpings centralstation
Flughafen Berlin-Schönefeld	Nymburk hlavní nádraží
Berlin Zoologischer Garten	Olomouc hlavní nádraží
Bilbao-Abando/Bilbao Estación del Norte	Olsztyn Główny
Bielsko-Biała Główna	Oostende Kaai
Boden Central	Opole Główny
Bologna Centrale	Orense-Empalme
Bratislava hlavná stanica	Oslo Vestbanestasjon
Bratislava-Nové Mesto	Oslo Østbanestasjon
Brest Central'nyj/Брест-Центра́льный/Брэст-Цэ́нтральны	Ostrów Wielkopolski
Brindisi Marittima	Palermo Centrale
Brno hlavní nádraží	Paris Nord
Brussel Noord/Bruxelles Nord	Pescara Centrale
Brussel-Leopoldswijk/Bruxelles-Quartier-Léopold	Pisa Centrale
Brussel Zuid/Bruxelles Midi	Plauen (Vogtland) Oberer Bahnhof
Budapest Déli pályaudvar	Plzeň Gottwaldovo nádraží
Budapest Keleti pályaudvar	Poznań Główny
Budapest Nyugati pályaudvar	Przemysł Główny
Catania Centrale	Praha hlavní nádraží
Charkov Passažirskij/Харьков Пассажи́рский	Praha-Libeň horní nádraží
Coimbra-B	Praha-Smíchov
La Coruña-San Cristóbal	Praha střed
Elche-Parque	Reggio di Calabria Centrale
Eskilstuna centralstation	Roma Termini
Falköpings centralstation	Rotterdam Centraal (Station)
Firenze Santa Maria Novella	Rødby Færge
Gdańsk Główny	Sevilla-Plaza de Armas
Gdynia Główna Osobowa	Sevilla-San Bernardo
Genève [SNCF: Genève-Cornavin]	La Spezia Centrale
Genova Brignole	Stockholms central(station)
Genova Piazza Principe	Sundsvall Central
Göteborgs centralstation	Szczecin Główny
Granollers-Centro	Södertälje södra
Großenbrode Kai	Torino Porta Nuova
Den Haag Centraal Station	Trieste Centrale
Den Haag Hollandsche Spoor(weg)	Uddevalla centralstation
Den Haag Staatsspoor(weg)	Uppsala Central

Halmstad centralstation	Ústí nad Labem hlavní nádraží
Hamburg-Altona	Utrecht Centraal (Station)
Helsingborg Färjestation/Ångfärjestation	Valencia-Fuente (de) San Luís
Hoek van Holland Haven	Valencia-Término/València-Terme
Huelva-Término	Vejle Hovedbanegård
Kalmar centralstation	Venezia Santa Lucia
Karlstads centralstation	Verona Porta Nuova
Kazatin Passažirskij/Казатин Пассажирский	Vigo-Principal
Kiev Passažirskij/Киев Пассажирский	Västerås centralstation
Kiruna centralstation	Verviers-Central
Konotop Passažirskij/Конотоп Пассажирский	Warszawa Centralna
Kraków Główny	Warszawa Gdańska
Københavns Hovedbanegård	Warszawa Wschodnia (Osobowa)
Kornwestheim Personenbahnhof	Warszawa Zachodnia
Kornwestheim Rangierbahnhof	Wien Franz-Josefs-Bahnhof
Lamezia Terme Centrale	Wien Südbahnhof
Leningrad Varšavskij Vokzal/Варшавский вокзал	Wien Westbahnhof
Liège-Guillemins	Wrocław Główny
Lisboa-Santa Apolónia	Zagreb Glavni kolodvor
Livorno Centrale	Zagreb Zapadni kolodvor
Lunds centralstation	Zaragoza-El Portillo
L'vov Główny	Zürich Hauptbahnhof
Madrid-Atocha	Zvolen osobná stanica
Madrid-Atocha (Apeadero)	Århus Hovedbanegård
Madrid-Chamartín	Ängelholm centralstation
Madrid-Príncipe Pío	Örebro centralstation
